2020 CHANGES

CYLINDERS

- Precision honing for consistent sealing of rings at high temperatures.
- Cylinder bore allowing faster and better break-in resulting in improved oil retention and longer cylinder life.

CYLINDER HEADS

- Cooling fins increased in surface area for improved cooling efficiency.
- Exhaust port reduced in length for decreased cylinder head temperature.
- Optimized intake and exhaust ports geometry for improved flow of gasses.
- Redesigned cylinder head covers.

FUEL INJECTION SYSTEM

- All new EFI system utilizing Keihin throttle bodies.
- Electronic idle speed control for better start ability and stable idle speed.
- Throttle position sensor for improved throttle response.
- Fuel injector location optimized for increased efficiency.
- Closed-loop EFI system for better fuel efficiency.
- System fuel pressure increased for improved fuel atomization.
- New self-priming, in-tank fuel pump with integrated filter and pressure relief.
- High-efficiency catalysts for reduced pollution without sacrificing power.
